- Pay-as-you-go, typically £200-300/month for active users
- Cost optimization support included

Customer Success

> " *Before I met Moterra, I was sceptical that GenAI could actually work for business. I thought it was mostly for playing around and drafting LinkedIn posts. But with Moterra's Business AI Suite, our company got Perplexity/DeepSeek, ChatGPT, and Copilot capabilities all in one platform – built for our business, in a private AWS environment. It's delivering real productivity gains, not just hype.*
